✳ Insight 0:

<pre>main() Goal Goal(question='What is the relationship between total receipts and total disbursements across different party affiliations?', visualization='Scatter plot of Total_Receipts vs. Total_Disbursements, colored by Party_Affiliation', rationale="This visualization will reveal if there's a correlation betwe...")</pre>	
A visualization goal	
index int	0
question str	'What is the relationship between total receipts and total disbursements across different party affiliations?'
rationale str	"This visualization will reveal if there's a correlation between fundraising and spending for different parties. The use of color will highlight potential party-specific spending patterns. Analyzing the spread of points for each party will reveal variations in campaign finance strategies."
visualization str	'Scatter plot of Total_Receipts vs. Total_Disbursements, colored by Party_Affiliation'

✱ Insight 2:

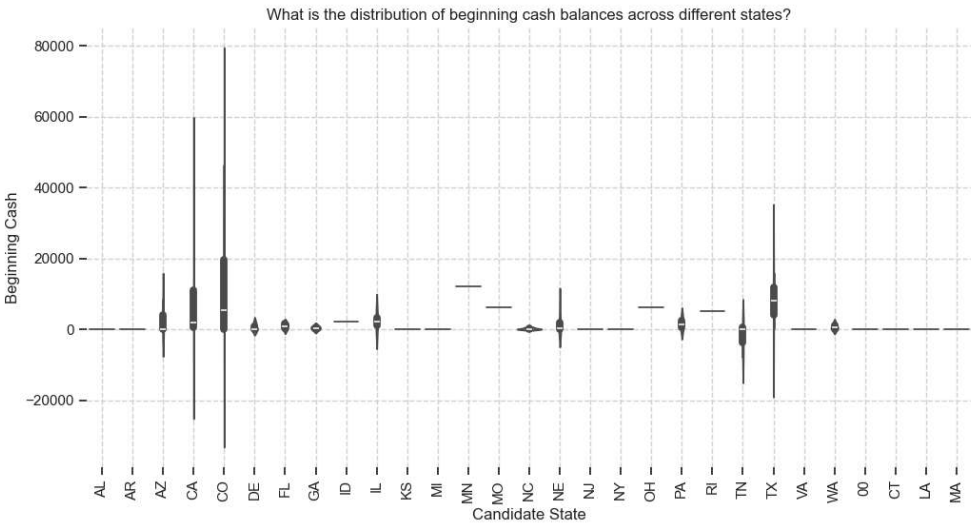

```
main() Goal Goal(question='What is the distribution of beginning cash balances across
different states?', visualization='Violin plot of Beginning_Cash grouped by
Candidate_State', rationale='This visualization will illustrate the variation in
starting financial resources across states, providing insights into t...
```

A visualization goal

index	int	2
question	str	'What is the distribution of beginning cash balances across different states?'
rationale	str	'This visualization will illustrate the variation in starting financial resources across states, providing insights into the influence of

geographic location on campaign finances. A violin plot combines box plot information with a kernel density estimation to show both distribution and density.'

visualization str 'Violin plot of Beginning\_Cash grouped by Candidate\_State'

## ★ Insight 4:

```
main() Goal Goal(question='How do total receipts change over time (by month)?',
visualization='Line chart of Total_Receipts over time using Coverage_End_Date (after
converting to a datetime object and extracting month)', rationale='This time-series
analysis will illustrate the fundraising trend throughout the c...
```

A visualization goal

index <code>int</code>	4
question <code>str</code>	'How do total receipts change over time (by month)?'
rationale <code>str</code>	'This time-series analysis will illustrate the fundraising trend throughout the campaign period, potentially revealing peaks and valleys in contributions. Extracting the month from the date allows for a high level view into seasonal trends.'
visualization <code>str</code>	'Line chart of Total_Receipts over time using Coverage_End_Date (after converting to a datetime object and extracting month)'
